

# logi-sys

Logi-Sys is a web based, end-to-end, modular, scalable and enterprise-wide 'Logistics Suite' for managing the business of international Freight Forwarders, NVOCCs and 3PL companies effectively. Logi-Sys provides a single-window view of operations across locations, helps manage revenue flows, streamlines documentation and meets regulatory requirements. Logi-Sys tracks job status and can enhance customer satisfaction by providing real-time updates.

Logi-Sys provides automated management of Air Freight and Sea Freight Forwarding operations with ease and speed. It can address challenges of documentation, consolidation, customer relations and shipment tracking in a cohesive and integrated manner. Logi-Sys enables comprehensive management of freight rate buying and selling which ensures higher profitability. It helps you in controlling revenues by managing billing, regulating expenses and monitoring payments.

Managing containers and tracking them from yard to yard is a complex task which is simplified by Logi-Sys. In addition, it enables you to manage and track Purchase Orders on behalf of your customers and provide them with online job tracking facility. Logi-Sys facilitates Electronic Data Interchange (EDI) with carriers, customers, ports, agents and country-specific customs gateways and other entities.

## Freight Forwarding

Logi-Sys facilitates complete automated management of air and sea freight forwarding by managing outbound and inbound shipments with ease and speed.

- Handles shipments, right from booking through delivery to the consignee
- Generates AWB/HAWB and BL/HBL
- Generates CAN/DO
- Planning, routing and manifesting shipments
- Shipment consolidation
- Keeps track of buying and selling freight rates
- Monitors and manages revenue flows
- Manages billing and records payment
- Enables post-shipment analysis
- Plans container stuffing
- Ensures and controls customer credit
- Prints bar-coded labels

## Track and Trace

It gives complete shipment visibility to users and customer by efficiently tracking shipments till they reach their destination. This also improves customer satisfaction.

- Intuitive and graphical tracking interface
- Shipment/ container tracking
- Provision for online tracking to customers
- Sends job status via e-mail

## Alerts and Notifications

A user defined alerts and notifications system can notify relevant persons about important events by giving alerts at specified frequency or on specified activities. This helps to ensure that no important events are overlooked.

- Provides pre-warning about upcoming activities
- Reports any lapse in process
- Notifies on the completion of every milestone
- Enables email alerts

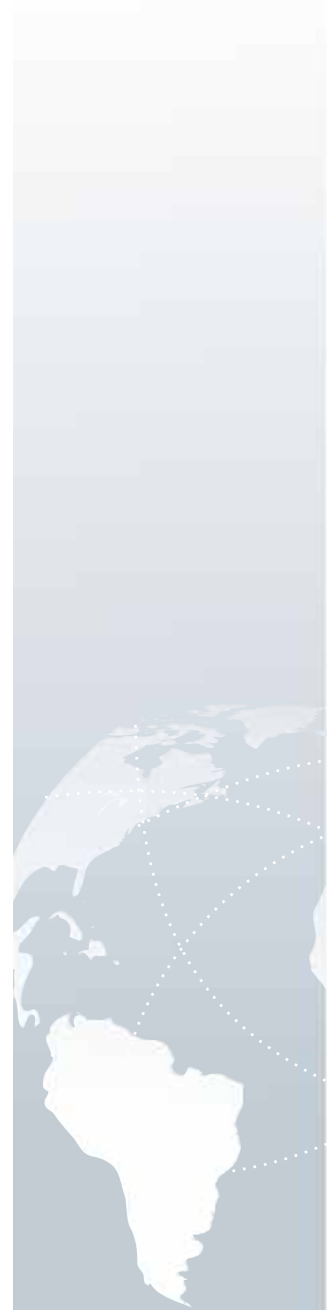

## Web based interface for Customers

A web interface can be developed based on the specific needs of your customers, to provide complete visibility of their shipments.

- Consignment tracking
- Booking request
- BL instructions and printing
- Purchase order tracking
- Can view invoice and accounts

## Purchase Order Management

Logi-Sys allows user to record Purchase Orders on behalf of customers and link them with shipments. It eases tracking of shipments linked with respective Purchase orders till their final execution. Logi-Sys can provide online tracking to customers and also alerts the user about Purchase Orders reaching expiry.

## Container Management

Logi-Sys enables visibility of containers stored in yards or in transit, detailing location, condition and load.

Easy access to container information drives true end-to-end management of assets.

- Manages inventory
- Container allocation
- Detailed tracking
- Revenue management

## Reporting and Analysis

Logi-Sys is equipped with an elaborate reporting system which enables users and managers to analyse their respective functions. This also helps the management in timely decision making. Logi-Sys provides the facility for users to obtain reports in extremely flexible and customizable ways.

- A number of powerful and detailed reports
- Provision for graphical MIS reports for easy decision making
- User configurable dashboards provide views of critical information and Key Performance Indicators (KPI)
- Reports can be e-mailed on a defined frequency

## Softlink

Softlink Logistic Systems is dedicated to enabling organizations in the logistics industry to 'simplify operations' through highly specialized software products.

Our deep domain expertise and experience in logistics and international trade, combined with strong technological know-how go towards creating truly winning products. These products deliver enhanced management control, revenue realization and accurate international trade documentation to users.

Exporters, importers, Custom House Agents/ Customs Brokers, Freight Forwarders, NVOCCs and other logistics service providers experience a true boost in productivity and operational efficiency through the use of our products. Our success in meeting their needs is proven by our dominance among these segments in a demanding market like India.

Our products are supported by excellent support systems that serve our global customers through multiple communication channels such as telephone, e-mail, online chat and personal visits.

### **Softlink Logistic Systems Pvt. Ltd.**

606-607, Wellington Business Park I,  
Near Mittal Industrial Estate  
Andheri Kurla Road, Marol,  
Andheri (E), Mumbai 400 059, India.  
Tel: 91 - 22 - 4034 0000

Logi-Sys is a web based solution that enables real-time access across multi branches and information sharing amongst employees, customers, agents, carriers, customs, ports, etc.

### **Logi-Sys serves specific needs of all players in the logistics and international trade ecosystem including:**

- Freight Forwarders
- Air Cargo Agents
- 3PL Companies
- NVOCCs

Logi-Sys enables extensive EDI capabilities with various stakeholders - carriers, customers, ports, agents, country-specific customs gateways and other entities. This facilitates faster document processing, reduces costly errors and increases responsiveness.

- Links with shipping lines directly or via INTTRA
- Reads invoice and BL instructions sent by shippers automatically
- Can link with ports
- Complies with country specific customs regulations
- Electronically exchanges data with local or destination agents

Logi-Sys can meet the needs of major multinationals through its powerful features, yet is simple enough for Small and Medium Businesses to implement - supporting and automating the highly fragmented logistics process that is used by service providers all around the world.
